PROFILE

GoHighLevel specialist who builds and repairs complete client systems: CRM pipelines, funnels, email/SMS automation and AI workflows. Every engagement starts with an end-to-end audit of the existing account (pipelines, workflows, forms, calendars, integrations) before anything is built, so the result is a system that runs without babysitting: leads get tagged, nurtured and booked automatically, and owners see performance on dashboards instead of hunting through pipelines.

CORE SKILLS

GoHighLevel & CRM

Pipelines, sub-account and snapshot architecture, white-label SaaS setup, migrations from ClickFunnels, spreadsheets and old CRMs

Email & SMS automation

Tagging, segmentation, nurture and reactivation; A2P 10DLC registration; SPF/DKIM/DMARC deliverability

AI workflows

GHL Conversation AI, chatbots and voice-agent routing, always with a human-takeover path

Funnels & websites

Lead-gen, booking, webinar and high-ticket funnels; GHL, ClickFunnels, WordPress and Kajabi pages

Integrations

Zapier, Make, n8n, webhooks and APIs, Stripe, Meta Pixel + Conversions API, GA4, GTM

Ads & marketing

Facebook/Instagram ads, campaign management, A/B testing, lead generation, marketing operations

EXPERIENCE

Founder & Lead GoHighLevel Specialist

5+ years · Remote

Uriel Creative Digital Studio · also listed on Upwork as GoHighLevel & ClickFunnels Automation Specialist and GHL Real Estate specialist

- Audit, build and repair GoHighLevel accounts end to end for real estate, coaching, fitness and membership, healthcare, nonprofit and agency clients, including white-label/SaaS setups.
- Design CRM pipelines, custom fields, tags and snapshot architecture so leads are never lost or duplicated.
- Build funnels around the real customer journey (lead gen, booking, webinar, high-ticket) with connected email/SMS workflows and A2P 10DLC compliance.

- Connect GHL to Stripe, Meta, GA4, Zapier, Make and n8n, adding external tools only where GHL's native features can't do the job.
- Migrate customers from other platforms into GHL without losing history, then hand over with documentation, recorded walkthroughs and post-launch support.
- Longest-running build: a full real-estate GHL system (funnels, website and end-to-end automation), live and delivering since August 2024.

WHAT CLIENTS SAY

“Working with Emmanuel was a great experience from start to finish. He took my Go HighLevel idea for a simple funnel and turned it into a complete system that works efficiently. The GHL landing pages look great, the website feels polished, and the entire setup is easy to navigate. The HighLevel automation he built is very impressive — everything works together seamlessly, and I don't have to manually follow up with leads anymore. Emails, SMS, tagging, and pipeline updates are all handled automatically. He was very responsive, delivered everything on time, and took the time to explain how everything works. I'd definitely recommend him.”
